Press Release

Trans-Trade expands US Logistics Presence with Acquisition of Forward Logistics Group

DFW Airport, TX, August 4, 2010: Trans-Trade, a leading Dallas/Fort Worth-based logistics supplier, announced today that it has completed the acquisition of Forward Logistics Group. Headquartered in Orlando, Florida, Forward Logistics Group (FLG) provides a full range of logistics services in Orlando, Miami and Denver.

This is the first acquisition of several planned by Trans-Trade over the next 3-to-5 years. This acquisition expands Trans-Trade's geographic footprint in North America to include key locations that strengthen its Central US coverage and provides a strong presence in the South/East US. FLG adds additional experience in key industries such as ocean cruise line logistics support and military procurement and fulfillment.

Brad Skinner, CEO of Trans-Trade, Inc. stated: "The acquisition of the Forward Logistics Group is the first of many planned. FLG is a like-minded company which complements Trans-Trade's vision and model to serve companies throughout the world by providing superior customer service and exceptional quality with state-of-the-art systems and back office efficiency."

"We are very excited to become a part of the Trans-Trade family," states John Jordan, President of FLG. "They are a remarkable company on a fast-track to become a strong global player in the mid-market logistics business. We share similar philosophies on service offerings and a rock-solid commitment to superior customer service."

Trans-Trade will focus on expanding FLG operations in their current markets, and in providing systems and back office functionality to enhance customer service and efficient processing of customer transactions and inquiries.

Trans-Trade, Incorporated is a full-service supplier of transportation and logistics services for clients in the United States and worldwide. Founded in 1984, Trans-Trade has grown to become a leader in innovative end-to-end supply chain solutions that provide a clear competitive advantage.
